

FLEXDECK TABLE FORMS

Flex Deck is a very versatile and flexible system with easy adaptability to changing slab requirements. Formwork facing is freely placed plywood, while primary and secondary girders are HT20 timber beams. Shoring system consist of TD-EN series adjustable props with special FlexDeck heads which will be connected to the main beams of the table with help of its wedge and can be dismantled with one hammer chop. For squeezed openings such as beams and parapets a tiltable head version is also available.

FLEXDECK MASA KALIBI

Flex Deck Masa Kalıbı 4.9 m yüksekliğe kadar olan döşemelerde oldukça kullanışlı ve hızlı bir döşeme sistemidir. Ana ve tali mahyalarda HT 20 kullanılır ve mahyalar kendi aralarında da özel elemanlarla sabitlenir. Ana mahyaları dikmelere bağlayan özel başlıklar sayesinde sistem güvenle kullanılır. Kiriş ve parapet arasına sıkışmış dar açıklıklardan masaları çıkartabilmek için özel katlanır başlık da vardır.
